

Why Patient & Medication Safety is important?

Ensuring safety and wellbeing of patients in hospitals and other healthcare facilities is a cornerstone of our existence and a key responsibility. The challenge for health care organizations is to foster a culture of safety and to continually identify opportunities to improve and assure the safety of patients being treated at health care facilities. This workshop has been designed to enhance the level of patient safety awareness among the healthcare professionals and to ensure a safe environment for high quality patient care.

Objectives:

- Connect leaders and healthcare professionals to create and sustain a culture for patient and medication safety.
- Share best in class medication management and safety practices aiming to create a safer environment of care.
- Align with the global effort launched by the world health organization (WHO) to halve medication-related errors within 5 years.
- Provide the opportunity to engage in a specialized post presentation workshop.

PATIENT & MEDICATION SAFETY IN HEALTHCARE SETTING

Be Aware for Safe Care

BE WITH US

Saturday 7th October 2017

Ramee Grand Hotel
Seef Area.
